Dr. Oliver McGee

When My Party Turned Left, I Turned Right *How It Will Be Okay to "Jump the Aisle" in the Post-Obama Era*

Dr. Oliver McGee *was an adviser to President Bill Clinton*, as the former U.S. Deputy Assistant Secretary of Transportation, and a devoted moderate Democrat, who would have been a natural choice to play a role in the Obama White House — but then, something incredible happened.

Concerned with social, technological, educational, economic, and political (STEEP) issues that he finds are hurling the country into a dangerous morass and malaise, this mechanical engineering professor and expert in jet propulsion (literally a rocket scientist) - who has studied business, law, and technology at Harvard, MIT, Georgia Tech, Stanford, Wharton, the University of Chicago, University of Cambridge, Ohio State, and The Aspen Institute — **approaches social, political and economic topics in the same manner he addresses everyday scientific questions.** He has come up with empirical and anecdotal indications for why our political leaders and present-day policies are doing more harm than good for the struggling country.

His progressive colleagues did not know what to make of him jumping the aisle. But, Oliver McGee hung on to his evolving principles and drafted them in "*Jumping the Aisle — How I Became a Black Republican in the Age of Obama.*" Where he calls for a choice to speak to, listen for, and vote with your own mind — **not just past loyalty to a party or to a history.**
